Abusing Beame.io Network

We want Beame.io Network to be useful and safe for users.
We don't allow:

- Malicious or unwanted software: Malicious software or "malware" that may harm or gain unauthorized access to a computer, device, or network (Examples: computer viruses, ransomware, worms, trojan horses, rootkits, keyloggers, dialers, spyware, rogue security software, and other malicious programs or apps)
- Spreading email spam, child pornography, abusive, defamatory or obscene material

- Hosting or promotion of criminal or terroristic content or illegal activities of any kind, including but not limited to, violations of intellectual property rights or privacy rights of Beame.io or any third party
- Interference with Beame.io in any manner or tampers with or attempts to probe, scan or test vulnerabilities of Beame.io or Beame.io's computer systems or network or attempts to breach any of Beame.io's security or authentication measures

If we detect that any of the conditions provided in this license are violated we are allowed to revoke the compromised certificate, along with its parent, up to, and including, corresponding L0 certificate. Also the emails used for registration of compromised certificate and its parent up to L0 will be added to the list of restricted users.
